September Weather.

Dr. Ira Hicks, writing from St. Louis, makes this prediction for September weather:

high temperatures in all the country, except, perhaps, the extreme West and North, from which points storms will have moved, most likely, and the change of wind and temperature will have set in behind them. Central regions will get the crisis of the heat and temperature will be the crisis of the heat and the control of the control of the control of the crisis of the heat and the control of the crisis of the heat and the critical critica storms about the 1st to 2d, and eastern sections about the 2d to 3d. The change to cooler will follow promptly everywhere, and dominate the weather until the return to storm conditions on and touching the reactionary 6th and 7th. A short-lived cool spurt will follow in the wake of reactionary storms, reaching all parts twelve to twentyfour hours after the storms pass east of given points.

ber is always marked by abnormal electrical excitement. The new moon is on the morning of the 10th, and a storm period is central on the 12th. We therefore advise that all storm developments about the 10th to the 14th be quietly watched. It is apt to grow very warm, the barometer will fluctuate, finally falling to danger readings in many places, and black clouds with heavy storms will visit all parts. Cy-clones are likely to develop in the equatorial regions, striking our southern coasts in their progress north and FOR SALE BY E.S. LEADBEATER & SONS east, and causing danger to shipping on the Atlantic, and far inland from the Atlantic many active storms. After the elemental battles, the gates leading to North Polar space will be opened, and the advance forces of boreas will rush in, causing a very marked change to cooler. Frosts are very apt to result in many northern

Be on the watch for them. The change may suddenly drop upon you on the heels of the first storm dash. Storms may suddenly develop at any time when our globe is passing its equinox, but the most marked disturbances will appear at the regular times. About the 17th and 18th will center a change to warmer weather with threat-ening storms. Autumnal blasts will miss no opportunity to break in from the North after every equinoctial storm. Be on the watch to the North

possibly, into earlier sleet and snow. Very cool weather will follow, generally, up to the closing days of the month, at which time it will grow warmer, and reactionary storms will be on as the month expires.

Antonio Bachetich died on Sunday morning in the seamen's boarding house of Lucas Bachlet at Philadelphia, having refrained from eating food for 76 days. Just before he died he called for food, but had only taken a little beef tea when he fell back dead in the arms of an old shipmate. Bachetich was 50 years old and a native of Austria. He had followed the sea since boyhood, and when he visited Philadelphia he always lived at Bachlet's house. June 11 last he went to the breakfast table. There was no knife, fork or spoon at his plate, and he left the table in anger. He declared that he would never again eat a morsel of food. Finally he refused to talk to any person. Although he hadn't eaten for a month and had wasted away, he was able to take long walks about the city. Friends

followed to see if he bought food, but he never did. Every day he scooped up a little water from under a hydrant and drank it. He refused to have a physician or to go to a hospital. He was well cared for in the boarding house. Every night a roast chicken or other food was placed at his beside, but he always threw it to present the same, duly authenticated to away. About a month ago he was a mere skeleton and was unable to leave his bed. Dr. L. E. Taubel was then called in. He made numerous efforts to get the man to take nourishment, but failed. The Rev. Father Smith of St. Philip's Church was unable to in-Special formulas skilfully and accurately duce him to take food. Women of the neighborhood begged him, but he remained firm in his determination. few days ago he summoned all the

The storm period central on August 31 will give us the major part of its storms during the three first days of September. The month will open with

From the 10th to the 15th of Septem-

On the 22d our equator cuts the sun, making day and night equal every-where, and introducing spring to the southern and autumn to the northern hemisphere. These great forces can-not shift to opposite ends of our rushmany conflicts of atmosphere and electricity. From the 21st to 26th we sail past the center of our autumnal equinox. The "Vulcan" period is central on the 23d, Mercury is central on the 25th, and the moon is full on the same Extracting, 25c With gas or zono, 50c date. These facts warrant us warning of dangerous storm possibilities, say about 22d to 26th, inclusive. A goodsized polar wave will spread over our deck from the Northwest after the storms, overtaking their northern and western flanks, and changing the rain,
